Important Information about the Wi-Fi Pod (module B3A).

Installation and safe usage instructions:

It is your responsibility to familiarize yourself with the safety instructions and warnings in this document, and to use the device properly.

When using this device, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury, including the following:

1. Do not connect the Wi-Fi Pod to an extension cord, receptacle, or any other outlet unless the prongs can be fully inserted and with no part of the prongs exposed.
2. In case the set up or use requires it, connect an RJ45 cable between the Ethernet port of the device and the Ethernet port of a Gateway.
3. Do not use this device near water and avoid any contact with moisture. For example, do not use near a bathtub, bathroom sink, kitchen sink, washer, in a humid location or near a swimming pool. Care should always be taken to avoid any spillage of liquids or food on this device.
4. This device is strictly for indoor use and is not certified for outdoor use.
5. Avoid blocking, by any way, the ventilation of the device as well as the flow of air around the device. Do not install the device in a constricted area, closed location or cabinets in order to maintain a free air flow circulation around the device.
6. This device should be kept away from any heat sources, such as radiators, heaters, stoves, or any other heat producing equipment. Do not expose this device to temperatures below 32°F or above 95°F.
7. Unplug this device before cleaning. Do not use liquid or spray cleaners, remove dust with a damp cloth only.
8. This device should not be disassembled or altered in any way. If service is required, consult qualified service personnel. For any issue or questions with the device, please contact your vendor.
9. This device may contain small parts or be dangerous for children. Keep out of children's reach.
10. Should the device malfunction or fail to perform as expected, stop using it immediately.
11. To disconnect this device from the electrical power, unplug it from the outlet.

Industry Canada Statements

- This Class B digital apparatus complies with Canadian ICES-003.
- This device complies with RSS-247 of the Industry Canada Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation

IMPORTANT NOTE:

Radiation Exposure Statement:

This device complies with "Industry Canada RSS-102 for radiation exposure limits set forth for an uncontrolled environment".

This device should be installed and operated with minimum distance 30cm (0.99ft) between the radiator and any nearby person.

Federal Communications Commission (FCC) Statements

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Modifications:

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the device.

Palo Alto, California 94306
United States of America

Radio Frequency Interference Statement

Note: This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential or business installation. This device generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Increase the separation between the device and receiver.
2. Connect the device into an outlet on a circuit different from that to which the receiver is connected.
3. Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This device complies with "FCC1.1310 for radiation exposure limits set forth for an uncontrolled environment". This transmitter must not be co-located or operate in conjunction with any other antenna or transmitter.

This device produces radio frequency energy in the 2.4 GHz and 5 GHz spectrum. The antenna should be positioned to keep a minimum distance of 30cm (0.99ft) from the radiating element to any nearby person.
